CORE VALUES

INTRODUCTION

Since its inception in 1992, Vistar Services Limited has been pioneering Radio, Telecom, Security (including Tactical Vehicles) and Electronic Technologies for the 21st century in Nigeria. With offices in Abuja, Lagos, Ghana, Europe and the United States, Vistar Services Limited has continuously rendered sound technical advice and customized solutions to its local and international clients.

To our discerning clients, Vistar Services Limited is a reliable partner and trusted advocate in various security services. We provide excellent technical advice effectively backed by first class solutions that exceeds expectations.

Over the last decade, Vistar Services Limited has garnered an inspiring track record of providing first class specialised services in security consulting, aviation communication, communication transceivers, marine communication & safety products, total surveillance solutions and state-of-the-art digital telecoms equipment deploying the latest Digital Advanced System in Two way radio communications

Our successes in providing solutions have been a source of satisfaction and pride to clients and have been positively acknowledged. We place high regards to referrals from previous clients which will constitute a good position for our future client.

PRODUCTS

RADIOS

By contrast, two-way radios allow staff to communicate instantly and effectively, saving costs, improving efficiency, ensuring resources are mobile and available where needed to ultimately deliver a better experience to players.

The beauty of two-way radio communications is that once you have received your license to operate, all communications between users are instant and free save the cost of the equipment;

PRIVATE AUTOMATIC BRANCH EXCHANGE (PABX)

For voice conversation, your telephone system is an integral part of your establishment and is your main tool of communication. It is your primary link to your business partners, customers, suppliers, employees, colleagues, friends, and even family members.

METAL & EXPLOSIVE DETECTORS

Weapon detectors are extensively used to provide security to buildings and secure areas by scanning individuals for weapons and contraband as they pass through the detection gate. Most people will be familiar with their operation in airports, government buildings and banks. They are increasingly being used with great effect in shops, offices, theatres, nightclubs, sports stadiums etc. Indeed anywhere there are concentrations of people or where the risk of an attack is a possibility. Vistar services offer a wide range of walk through detectors including the advanced multi-zone WI-5X with auto-calibration programs

PRODUCTS

BALLISTIC PROTECTION

Ballistic vests use layers of very strong fiber to "catch" and deform a bullet, mushrooming it into a dish shape, and spreading its force over a larger portion of the vest fiber. The vest absorbs the energy from the deforming bullet, bringing it to a stop before it can completely penetrate the textile matrix. Some layers may be penetrated but as the bullet deforms, the energy is absorbed by a larger and larger fiber area.

CCTV

Invading a complex or business under CCTV surveillance by hiding from the CCTV cameras can only happen in nollywood heist movies, not in real life. A well set up CCTV system is practically impenetrable, with multiple cameras keeping an eye on each others' blind spots in addition to keeping an eye on the most vulnerable areas on your property and business. Vistar services offers you the best of surveillance cameras made from first class chips.

SPY GADGETS

If you are in need of gathering evidence on any matter, then you must be looking for spy equipments. But quality spy equipments are not very easy to find. There are lots of places where you can find the spy equipments but irony of fact is only a few offer quality products. Looking for the ultimate spy equipment, Vistar Services offers great spying equipments that will help you to track people you want to.

OPERATIONAL PROCEDURE

PREVENTIVE MAINTENANCE

Vistar Services Limited has the policy for maintaining top quality services in all we do. To achieve this, we deploy top standard materials and engage highly skilled professionals. We are advocates for safe work environment and insist on the use of protective equipment.

CORRECTIVE MAINTENANCE

We avoid faultier through our regular equipment maintenance

We run maintenance services for our clients and as a result, we keep a stock of quality spare parts

OPERATIONAL CHANGE

The project engineer will monitor all project activities and ensure that all operational procedures are followed and service level maintained

AD-HOC CALL OFF JOB

Vistar Services provide support services in accordance with section of the specimen contract document. We are ready to render services on ad – hoc basis when the need arises.
